# BLUE CROSS OF HYDERABAD

ANNUAL REPORT 2018-19

27 YEARS OF ANIMAL WELFARE SERVICE  
(1992-2019)

## Vision

We empower people to spread kindness and mitigate animal suffering on the streets, exponentially.

## Mission

We focus all our resources on training and stray animal birth control.

## Goal

To reduce animal suffering in the most sustainable and impactful way.

[www.bluecrossofhyd.org](http://www.bluecrossofhyd.org)

Dear Members, Volunteers, Donors and Friends of Blue Cross,

During the financial year of 2018-19, Blue Cross of Hyderabad was able to provide help to 10,844 animals; of which 8198 were through the Animal Birth Control /Anti Rabies Vaccination programme, and the rest were treated in emergency care, at our clinic and through our adoption drives.

Please join me in congratulating our team of dedicated Vets – Dr.Ananth, Dr.Sai and Dr.Niharika and our determined and resourceful CFO Mrs.Kumari. The rest of our employees led by Supervisor Dhanunajaya and Driver/Paravets Srinu and Ramesh.

Our team of agile and efficient dog catchers without whom we would not have been able to deliver the good results we have managed so well. Their efforts have been tireless and highly streamlined from experience.

Post transformation, operations at Blue Cross of Hyderabad have become so focused, the reviews take barely half an hour with solutions already in the pipeline. Our annual budget is very proactively raised by our CFO through support from United Way Hyderabad and CSR funds and the rest with some help from the Governing Board. My visits to Blue Cross have become less frequent, limited to weekends; and each time more and more young people seem to have taken the reins of caring for the animals enthusiastically. It is very rewarding both in impact and in spirit and I invite any group looking to transform, to do so with confidence.

I invite you to read this annual report and meet the people who have done the good work, read about our achievements and share the wisdom.

Thank you to all our donors, our Governing Board, our supporters, volunteers, sponsors and all the wonderful animal friendly people who stretch their kindness to include the animals. The blessings of the animal world are with all of you!

With best wishes,

Amala Akkineni

The animal birth control and anti rabies vaccination programme has become the prime focus of our efforts and the key to achieving our goal – which is to reduce animal suffering on the streets of our city. Our approach is scientific, by the book and to the last detail. Reason behind our meticulous work is because it works and gives best results. Our focused catching of dogs for sterilization is in GHMC west zone in these specific areas to make them Dog Managed Zones. Please see the snapshot below to capture place and numbers of dogs sterilized and vaccinated.

Numbers of Dogs Sterilized and Vaccinated area wise... 2018-19

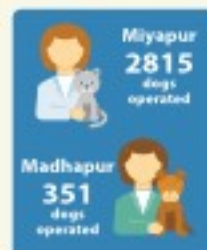

Total number of dogs operated 8198  
(3910 Male, 4288 Female)

Total number of cats operated 17

Grand total of operated animals  
8215 Dogs & Cats

Reduced Stray dog population  
432710 ( 3910, 4288 x 100)

Note: KPHB & Kukatpally are recently started

To achieve the desired targets we have two teams of expert dog catchers. Catching of the dogs is done in a humane manner, and so is the releasing of the dogs back to where they were picked up from, after the anti-rabies vaccinations.

Our 3 Vets led by Dr. Ananth work tirelessly to ensure the dogs are operated and a host of support staff to coordinate the post operative work. Our CFO Mrs. Kumari manages the administration, accounts and executes the community awareness efforts. Animal Birth Control with community awareness and an annual community drive to revaccinate dogs against Rabies, makes the area "Dog Managed Zone".

#### Community Awareness:

Regular community visits are conducted in the areas we operate dogs to create an understanding and support for Animal Birth Control. Additional topics explained are animal welfare, First Aid Outreach in various sections of society; mostly slums, colonies, residential societies. Many who semi own dogs but cannot afford Veterinary treatment, become allies in the dog management of the area. Blue Cross aims to reach a large target audience within the community so they support the Animal Birth Control/Anti-Rabies Vaccination efforts, how to behave around animals and thereby create safe communities.

#### Community Awareness

#### Execution of Community Awareness:

Volunteers collected data through a community questionnaire during a dog population survey prior to commencing the ABC drive. From the data, an Education and Awareness module was developed addressing all their concerns and successfully implemented. We provided the following information and understanding:

- Information on the ABC Program: its rationale, operations (what are the benefits of stray dog sterilization and vaccination for the community and how the community can support the Program).
- Rabies, Dog Bite Prevention and Post-Bite Treatment.
- Responsible Pet Ownership. Benefits of sterilising a Pet (Sadly this is still misunderstood by most)
- Reducing human-dog conflicts and awareness on safe human-dog interactions.

Our teams visited school, arranged public service announcements for the community and other mass communications through social media.

Blue Cross of Hyderabad holds a really special place in my life. I have been listening to the stories about Blue Cross of Hyderabad since my childhood from my cousins in the city. But due to fate I could never even pay a visit myself. In April 2018 I got an opportunity to visit the shelter and I was very impressed. It was like a dream come true for me and at that moment I decided that I want to be apart of this legacy.

I became a part of Blue cross of Hyderabad in September 2018, which was an honour for me. The first three months were hectic, but we still managed to reach the target number assigned, for the Animal Birth Control/Anti-Rabies Vaccination program. Targets are necessary to make a budget work.

*Approaching strays in a Humane manner by our catching team*

An organisation is as good as its people. The team here is very supportive and they do give their necessary inputs on my decisions. The support of the management has been a driving force behind our achievement i.e. of operating 1006 dogs in December 2018.

I thank the management and my colleagues for being there for me without whom it wouldn't have been possible. My team and I, are a family and we always have each other's back.

### Success Story

This sweet little Indie was brought to our Community Sponsored Clinic in the month of September. The forelimb was crushed and had multiple fractures, where pinning was not an option due to multiple fragmented fractures. We proceeded with amputating the left fore limb by disarticulating humerus from the scapula.

The surgery took an-hour-and-half but the most challenging part was the recovery as Snowy was malnourished and anemic. Snowy turned out to be a

fighter and recovered well from the anesthesia and was adopted (sponsored) soon. Ms. Anita Sharma who had lost her dog Sam due to old age and multiple organ failure adopted Snowy, happily. We are pleased to say that wonderful people like Ms. Sharma adopt dogs that need special care.

I came to know about Blue Cross of Hyderabad during my college days when they helped me in rescuing a puppy with multiple fractures. Since then I wanted to work with the organization. I am lucky that Blue Cross of Hyderabad had a vacancy at the time I graduated and I joined during in July 2018.

I was captivated by the place in my first visit. I was really surprised to see how a shelter could be maintained hygienically without compromising on animal welfare. I liked the way they care about animals. The best thing about Blue Cross is that they provide every requirement – nutritious food, Veterinary care, ample space for exercise and a clean and caring environment- for each animal. The management has provided all the facilities required for a Vet and have always supported me to do my job.

I look after the Community Sponsored Clinic from 9:00 am to 12:00 pm. In the afternoon I do ABC surgeries, which are the main objective of BlueCross of Hyderabad. Apart from Animal Birth Control (ABC)surgeries, we do surgeries for hematoma, tumor, hernia, amputations, etc.

People come to Blue Cross of Hyderabad with high expectations and in a run to live up to their expectations I have constantly improved myself. Even after closing rescue operations, people approach us for rescuing an animal or abandoning a pet. Most of the people understand that we have shifted our goals to serve the society and reduce animal suffering but some people don't understand. It requires patience explaining.

Blue Cross of Hyderabad discontinued rescue ambulance services and focuses on catching and sterilizing street dogs with the aim of reducing animal suffering on the street. We are committed to performing Animal Birth Control surgeries to reduce the numbers. Less puppies and breeding dogs on the streets directly impacts disease, accidents and other abuses involving animals. However, while catching dogs for ABC if our dog catchers find any suffering animal, they bring them to the shelter for treatment. We encourage people to care for puppies through Foster care, and host adoption drives from time to time on weekends.

Foster care of puppies ensure a few critical survival requirements:

The puppies get a clean, disease free, protected and homely environment, preparing them for adoption

The puppies get personalized care, food and grooming

Puppies do not catch fatal diseases that can be picked up at shelters

They smell great, get nice and plump and are socialized - used to human handling, when they come for adoption.

We conduct Adoption Drives at our adoption center where the foster care givers bring their beautifully groomed and cuddly pups for people to adopt. Many loving families as seen above, adopted Indian puppies and dogs; and kittens and gave them loving homes.

Success stories such as these motivate me to continue to serve animals for as long as I can.

Oliver was a 4-year-old abandoned male dog brought to the clinic by a young man who fed Community animals. The dog had a severe ear infection and dog bite wound on its limb. With the medical intervention and emergency care, the wound healed fast and the ear infection reduced. After its recovery the young man realized that he could actually make the dog his pet and he adopted it.

One of our staff and volunteer, Aparna, brought a male dog of about 5-years of age for treatment to the clinic. It had a protruded eyeball and bad swelling around the eye and the head, which clearly showed that it got beaten up with a rod. The dog was so traumatised that it didn't allow us to touch. After examining it, I noticed that one of the eyes was badly infected and had to be removed. A enucleation surgery was performed. After the surgery, the dog recovered fast and was released to its original place. Aparna took care of him for a few days till it was back to normal.

I came to know about Blue Cross of Hyderabad through one of my seniors at Veterinary college. I thought I would be happy if I work helping homeless animals and heal their sufferings through an organisation like this. When I visited for the first time, it was totally beyond my expectations. I have visited many Animal welfare groups but Blue Cross of Hyderabad is unique on its own.

I started working here since 22 Feb 2018, and it has given me a good platform to help homeless furry friends, and has also helped me add experience, knowledge and skills.

I understood what Teamwork is while working with Blue Cross of Hyderabad. I have all the support from the management, my colleagues and staff, having together achieved a target of 1006 surgeries during the month of Dec 2018. To accomplish this in one month, we needed planning, coordination, teamwork and commitment.

I am happy working here and intend to stay, grow and make a difference.

To share a success Story for you....

Gunner was a stray dog living in the parking lot of K.B.R Park. A kind person saw him suffering with paraphimosis (inflamed and exposed genitalia), rescued him and immediately took him to a nearby private clinic. As the rescuer couldn't afford the surgery at the private clinic, so he approached our shelter for the treatment.

Initially, the dog was given general treatment for reducing the inflammation, but unfortunately there was no improvement. So for his betterment we took a decision and proceeded with complete penile amputation, which was followed by castration and urethrostomy. The surgery took nearly two hours and the most challenging thing was post-operative recovery. Since the dog was active and naughty we were worried about the external sutures. But he

recovered perfectly well and had a great time being with us for a week. After he was completely recovered he was released back at KBR Park. It was a great feeling for us! Look out for Gunner when you next go walking there.

Training Conducted:

Training was conducted by the National Veterinary Foundation at our shelter. Dr. Gary and Dr. Lakshmi of The Animal Care Clinic and our Veterinary Advisor conducted the session for Qualified and licensed Veterinarians only. All the doctors, who came from various parts of the country, greatly appreciated the training, the learning's and believed they learnt new techniques. Thousands of animals across the country would now be beneficiaries of their efforts.

Pedigree's Mars India and Pet Practitioners Association of Telangana also held training at our facility. Dr. S. Sooryadas, Department of Surgery, College of Veterinary and Animal Sciences, Pookode, Kerala was the speaker for the session. The participants greatly benefitted from this training.

Apama Challa, BCH Education Officer Reports on our school outreach programme

It's always a pleasure to interact with young budding minds. Young Angels Program aims to help students understand animals. It is an interactive session of 30 minutes where students of Classes VI and above are addressed. Each session is a different experience where we mutually learn from one another.

### Understanding Animals Covers :

- Article 51 A (Law that supports Environment & Animals),
- How to behave around dogs,
- How to approach a strange dog,
- Do's and Don'ts with dogs.
- The topics also cover what Blue Cross of Hyderabad does to help for animals,
- The importance of sterilization and anti-rabies,
- Basic first aid for dog bite,
- The joy of adopting an animal instead of shopping for one.

Students and teachers enjoy us acting out how to approach a strange dog and often request for more sessions like this. They ask us questions on how could they involve themselves in regular animal welfare activities.

It has been an honour, joy and significance to work as Humane Education Officer for Blue Cross of Hyderabad.

We thank Pedigree for sponsoring Young Angels and help us reach the voice of voiceless to the coming generations, sowing fresh seeds.

The schools visited are listed below with the total number of 10,244 students who attended the sessions.

## A Big thank you to our Volunteers

Ravinder, Karthik, Venkat, Sridhar, Shravya, Hasitha, Rajeev, Karthi Kotha, Ruheena, Nitha, Shreya Paropakari, Shyam Sundar, Saradhi, Vikram Chandhak, Padma and Anusha.

Volunteers are people with kind hearts who spend countless hours devoting their time to the animals at the shelter. Our volunteers help us in many ways: From at-shelter support to at-home foster care, volunteers support every facet of our work and are crucial. As all animal shelters are non-profit, it means they are based entirely on donations of both time and money. Our volunteers step in and on many occasions help socialize the animals, spend time with them, walk them and even help clean their cages or feed them. Our volunteers are the glue that keeps us together.

Apart from our existing volunteers, this year we had 102 people join as volunteers. Many sign up for a month or 3 months and then move away. Through our volunteers, we are creating a better world for animals, and every time people volunteer they are fueled by love.

*Chirec School Students visit to Blue Cross*

We also give internships. This helps youngsters get exposure to working in an animal shelter while understanding the finer nuances of what goes on in a shelter. This year, we had Interns from as far as Romania, Egypt, Korea and of course Hyderabad through AIESEC and individually. Here is what they have to say:

## Interns Speak

### Prathima Pingali, from AISFM, Hyderabad ( Student of photography)

Working at Blue Cross of Hyderabad was an experience that surpassed my expectations. Everyone dedicates so much of their time and energy into caring for the animals that are not only in the campus of Blue Cross of Hyderabad, but also the ones on the streets. It was an eye opening and wonderful experience to see all of the hard work and responsibility that goes into running an Animal Birth Control centre.

### Matei Dumitru, from Transylvania, Romania

The experience with Blue Cross of Hyderabad was amazing. Being able to go in a different country far away from your own, and act in order to change the environment, and the city, for me counted more than the visiting part. We got to meet new people, willing to help us through our journey, as well as helping us with the tasks at BCH. Seeing those abandoned dogs and other animals there being taken care of, was a very different sight from the one I get in Romania. The Animal Birth Control and Anti-Rabies programs were very interesting to implement, and in doing so, I know we helped a lot more than just catching the dogs and eventually euthanise them, as it happens in other countries. Overall, the experience I had was incredible, and the BCH people made the experience with AIESEC people fade.

### Matei Alexandru, from Transylvania, Romania

When I was offered the opportunity to travel to one of the oldest civilizations in the world in order to help animals, I didn't have any second thoughts and accepted right away. At the first sight, Blue Cross of Hyderabad was a sanctuary for dogs (mostly) that I haven't seen in Romania yet. BCH adopted a different strategy compared with other shelters. The strategy to combat shelter

overcrowding was to neuter, sterilize and vaccinate stray dogs and release them back on the street where they can survive on their own. Another thing that impressed me was the love all the disabled animals get, as people came just to play, feed and tend to their needs. The staff was, as well, very caring for the animals. I learned a lot about constant animal care and the people made this volunteering stage a lot better, especially Miss Kumari and Ms. Usha.

#### Salma Riad, from Alexandria, Egypt

This place is absolutely amazing, with lots of love, especially on weekly adoption days! I learnt not to feel scared of dogs, how to approach them, to walk them and to care for them in the ABC ward. I miss Queeny, Coco, Whitey and pretty much all the happy healthy Blue Cross animals living there. I will never forget my experience there, how proud I am to say that I have volunteered at Blue Cross of Hyderabad. Special thanks to Ms. Kumari, Ms. Usha and my kind internship mates Alex and Dumi.

#### Sumin Ahn, from Seoul, Korea

When I first came to visit, I was already in love with the place. The dogs were so friendly, there were cows, camels, cats, donkey and a pig. The people and the staff were so friendly as well. The area is filled with nature that makes it even better for people who work there and I could feel the happy vibe all the time.

By staying with the dogs, I was able to learn about them and overall it was the greatest volunteering that I could ever have. So thank you Blue Cross of Hyderabad for this opportunity!

A glance our calendar of events for the year gone by:

- July 6th World Zoonoses Day, an Anti Rabies Vaccination Camp was held at our Community Sponsored Clinic, sponsored by Brilliant Bio-Pharma.
- August- Blue Cross AGM: Mr.RK Rao, ex president of BCH was felicitated with the Lifetime Achievement Award at our Annual General Meeting. Green Peace Team spoke about benefits of green initiatives and shared tips and suggestions on how to 'Go Green' effectively, to volunteers and members.

Mr. R.K. Rao was honoured

Team Green Peace India

- Certificates were given to the volunteers who completed their First Aid Training course. They got a fully-equipped backpack with medicines, to become community animal care takers, providing first aid for animals on the streets.

- September 28th was World Rabies Day – Anti Rabies Vaccination Camps were conducted in Jubilee Hills and at our Community Sponsored Clinic
- October 4th World Animal Day – We held an ARV Vaccination Camp in Madhapur and at our Community Sponsored Clinic.

Corporate volunteer teams visited Blue Cross Shelter as part of their

Corporate Social Responsibility initiative to spend a day with the animals and take care of them.

- November - Deloitte Celebrates their Impact Day at Blue Cross. Eager and happy employees of Deloitte came to volunteer, assist and help at Blue Cross of Hyderabad; as part of their social initiative Impact Day on November 23rd It was a wonderful and informative day for all!

- January- National Animal Welfare Fortnight: we revaccinated 2500 dogs with the Anti Rabies vaccination in Miyapur. This was sponsored by Brilliant Bio Pharma, so kindly organized by our Governing board member Mrs. Mourya Boda.

- March – June: we gave away Water Bowls to people for placing outside their gates, to quench the thirst of animals and birds, in the intense heat!

Various schools visited our shelter for children to get an opportunity to interact with the animals, learn about how to interact with animals and be compassionate. They are given a tour of the shelter and our Chairperson Mrs. Amala Akkineni addressed them with an overview of our work and how students can help animals.

- Chirec Public School visited our shelter and the excited students enjoyed their day with us.
- Aga Khan Academy –came to our shelter to spend a day and learn about animal welfare
- Architecture students from different colleges visited our shelter to see the rock formations, the layout of our shelter and understand in-depth about the requirements of an animal shelter.

Blue Cross of Hyderabad is now working with a renewed focus on Animal Birth Control/Anti-Rabies Vaccination Program and is functioning very well. People are now more aware and open to suggestions about how help animals in their area. Our Community Sponsored Clinic is also very busy, since many animal friendly people are getting not just their pets but also injured stray dogs from their areas for the sterilization and treatment, vaccinations and for general ailments. Foster care has become popular and people take care of puppies and kittens till we organize adoption drives.

**NSK Kumari, CFO**

We successfully conducted ABC/ARV in Miyapur, Hafeezpet & Madhapur in year 2017- 2018 and Kondapur, Gachibowli & Jubilee Hills in year 2018-2019. We started off the new year with Mass National Welfare Fortnights vaccinating a total of 2500 in Miyapur. For the coming year 2019-2020 we have started KPHB Colony.

I take this opportunity to thank the donors, without which our ABC/ARV program would not have been so successful. This year, we were able to implement it on a total of 8215 Dogs & Cats.

I would like to thank each and every one of the following: Deepthi Deloitte, Girija and Gouri from United Way of Hyderabad, Google, Tea Care Foundation, Mars International and Nasscom Foundation for their valuable donations. I would also like to thank our Annual Members, Life Members and Patron Donors for their support. Special thanks to our monthly donors and all our volunteers and members, and of course our support management.

Raju

Smokey

Sam

To conclude our beloved pets **Raju** and **Sam** (both 10-year-old blind shelter dogs), and **Smokey** (our cat) passed on. We pray for their eternal journey to be happy.

We welcome our new in-house pet dogs & cats, **Snooie**, **Logan** and **Akira**. As the older ones pass on, new life takes its place and this is the journey of life. Our shelter houses 120 blind and disabled rescued animals. There are cats, dogs, camels, pigs, donkey and cattle. We are always happy to find sponsors for them, so do remember.

- To sponsor the spay / neuter of one dog in our program please donate Rs.1500/-
- To participate in the Annadaan program to feed all the animals in our shelter, please donate Rs.6000/-
- To sponsor the care and feeding of one disabled animal for one month at our shelter, please donate Rs.3000/-

Volunteering is a privilege and service! To become a volunteer please email us at [info@bluecrossofhyd.org](mailto:info@bluecrossofhyd.org) or visit us to register as a volunteer at our Shelter on any Saturday between 2pm to 4pm only. You will be given an orientation session to start you off.

[See rule 17B]

Audit report under section 12(b) of the Income Tax Act, 1961 in the  
case of charitable or religious trust or institutions

We have examined the balance sheet of M/s.Blue Cross of Hyderabad (Society) as at 31st March, 2019 and income and expenditure account for the year ended on that date which are in agreement with the books of account maintained by the said trust or institution.

We have examined all the information and explanations, which to the best of our knowledge and belief were necessary for the purpose of the audit. In our opinion, proper books of account have been kept by the head office and the branches of the above-named trust/institution visited by us so far as appears from our examination of the books and proper returns adequate for the purposes of audit have been received from branches not visited by us subject to the comments given below:

----- NIL -----

In our opinion and to the best of our information and according to information given to us, the said accounts give a true and fair view:

- in the case of balance sheet, of the state of affairs of the Society as at 31st march, 2011 and
- in the case of income and expenditure account of the deficit for the year ending on that date.

The prescribed particulars are annexed hereto.
